

TRANSFER CREDIT POLICY

1. General

Regionally accredited colleges and universities in the United States which have been approved by regional accrediting associations are considered to have academic standards of sufficient quality to allow acceptance of their courses as transferable equivalents to Seattle University. Credits from all other U.S. schools are not accepted. International school transfer credit evaluations are done in accordance with nationally established norms. Students who enter Seattle University with a baccalaureate degree and wish to pursue a second undergraduate degree should refer to Policies 76-2 (Second Degree and Dual Degree) and 79-1 (Unaccredited and Newly Accredited Colleges and Non-Traditional Programs).

Only course content and credit are accepted in transfer. The associated grades do not become a part of the Seattle University record.

Students admitted while still attending another institution must submit a final, official record to the Office of Admissions by the tenth day of the student's first term of enrollment. Admission is provisional and contingent upon successful completion of coursework in progress. When a transferable associate degree is posted at a later date

1. Students studying for one or more terms in an approved education abroad program file an "Education Abroad Course Approval Form" and with the Office of the Registrar approval, the Residency Requirement is waived.
2. ROTC degree credit from the University of Washington may be applied to the Seattle University degree even during the student's senior year; for this specific program the Residency Requirement is automatically waived and a petition is not required for transfer of credit.
3. Because the civil engineering program requires 192 total credits, the Residency Requirement year commences with 147 credits. With the engineering department's approval for specific courses on a petition, credits may be transferred from a baccalaureate institution until the 147 ceiling is reached.
4. For transferring credits into Matteo Ricci College, refer to Policy 90-1 (Matteo Ricci College)

Students must meet University Core Curriculum (UCOR) at high school or college, and major

contribute to the 90 graded credits needed for honors at graduation. These credits will only be granted when total transfer credit is below 90, except in the case of military schooling coursework for which the credit recommendation is "upper division." All other studies in these categories are considered to be at the lower division level and, therefore, fall within the 90 lower division limitation.

1. Military Schooling Credit - procedures are detailed in Policy 75-a (in)2 ()]TJ3 Tw [0.004 Tc 0.002 T

2. If a physics series is included in the 90 completed credits, students seeking engineering or physics degrees or the B.S. in Computer Science-General Option, or the B.S. in Chemistry or Biochemistry must have successfully completed the calculus-based physics series in order to be granted credit for those courses.
 3. Students should consult with their respective college/department advisor on minimum transferable grade requirements when transferring with the E.A.S.
- G. Students earning approved degrees in WA state prior to matriculation will receive the same benefits as students in WA earning a DTA. See Policy 2012-1 (University Core Curriculum).

Transfer from California Community Colleges Students who complete an Associate of Arts degree as well as the Intersegmental General Education Transfer Curriculum (IGETC) track

Transfer from Oregon Community Colleges
Students who have earned the Associate of Arts Oregon Transfer Degree (AA/OT) prior to matriculation at Seattle University

Transfer from Arizona Community Colleges
Students who have earned the Associate of Arts Arizona Transfer Degree (AA/AT) prior to matriculation at Seattle University
